

INTRODUCTION TO THE ISLAND POWER APP

Between the 11th – 15th November, the Energy and Sustainability Centre are providing businesses with a free 30-minute introductory session to the Island Power App (IPA).

The IPA is a digital tool developed with the support of the Manx Lottery Trust which allows people to test what is and isn't possible with renewable energy on the Isle of Man.

Experts from the Energy and Sustainability Centre Isle of Man (ESC), in collaboration with the Technical University of Denmark (DTU), can provide a free 30-minute introduction to IPA to help company employees understand the options for generating and utilising green electricity on the Isle of Man.

For further information or to arrange a time for your business, please contact Rebecca Keeley via: ESC_events@outlook.com
